

Job Description: Data Analyst

Analytics - Full time

ABOUT THE ROLE

We are hiring a Data Analyst to turn operational data into decisions for the retail team, from pipelines to dashboards to stakeholder reporting.

RESPONSIBILITIES

- Build and maintain SQL data pipelines and dashboards.
- Analyse sales and inventory trends; present findings to non-technical teams.
- Run A/B tests and measure impact.

REQUIREMENTS

- 3+ years in data analysis.
- Strong SQL and Python (pandas).
- Dashboarding (Tableau or Looker) and solid statistics.

NICE TO HAVE

- dbt, experimentation frameworks, retail or supply-chain experience.
