

Job Description: Senior Software Engineer

Engineering - Full time

ABOUT THE ROLE

We are hiring a Senior Software Engineer to design and build the backend services behind our logistics platform. You will own systems end to end, from API design to production reliability.

RESPONSIBILITIES

- Design and build backend services and REST APIs.
- Scale microservices and improve reliability and observability.
- Mentor engineers and review code.

REQUIREMENTS

- 5+ years of backend software development.
- Strong Python and Go.
- Hands-on experience with AWS cloud infrastructure.
- Experience designing REST APIs and microservices at scale.

NICE TO HAVE

- Docker and Kubernetes, event-driven systems, SQL and NoSQL data stores.
