Summary

Data analyst with 6 years of experience turning messy operational data into decisions. Comfortable across the full pipeline: SQL, Python, dashboarding, and presenting findings to non-technical stakeholders.

Experience

Senior Data Analyst, Northwind Retail (2023-2026)

- Built a demand-forecasting pipeline that cut stockouts by 18% across 40 stores.
- Redesigned the weekly ops dashboard, cutting report-prep time from 6 hours to 45 minutes.
- Mentored 2 junior analysts and led SQL onboarding for new hires.

Data Analyst, Northwind Retail (2021-2023)

- Automated inventory reconciliation, catching \$120K/year in discrepancies.
- Partnered with marketing to A/B test promotions, informing \$2M in ad spend.

Junior Analyst, Bright Path Logistics (2019-2021)

- Maintained shipment-tracking reports for a 200-truck regional fleet.
- Built the first version of the on-time-delivery scorecard, adopted company-wide.

Education

B.S. Statistics, Riverdale State University, 2019

Skills

SQL, Python (pandas, matplotlib), Tableau, Looker, dbt, A/B testing, Excel/Sheets

Certifications

Google Data Analytics Professional Certificate (2022)

Projects

Open-source: maintains a small Python package (dq-check) for automated data-quality assertions, ~150 GitHub stars.
